***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burhrmann et al. (U.S. Patent Number 5,950,125) in view of Moelard et al. (U. S. Patent Number 5,371,738).

***Regarding claims 5,6***, Buhrmann et al. disclose a cellular mobile station comprising a control block, adapted so as to store the information required for recognizing a localized service area, whereby the mobile station is adapted so as to send a notification of its arrival in the localized service area in response to the recognition of the localized service area, said notification being intended as an impulse for changing the service selection offered to the mobile station (which reads on column 2 lines 60-65). However Buhrmann fails to specifically disclose a cellular mobile station having a memory means.

In the same field of endeavor Moelard et al. discloses a wireless local area network system with mobile station handover. Additionally Moelard et al. discloses a cellular mobile station having memory means as disclosed in column 4 lines 11-20.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to improve Burhrmann by modifying a location-dependent cellular service profile with cellular mobile station having memory means as taught by Moelard et al. for the purpose of storing and utilizing a transparent bridge to updated the system.

***Allowable Subject Matter***

2. Claims 1-4, 7-12 are allowed.

***Response to Arguments***

3. Applicant's arguments filed 10/02/06 have been fully considered but they are not persuasive.

Regarding applicants arguments concerning claim 5, the examiner disagrees that this is the apparatus claim associated with the system of claim 1, claim 5 is the apparatus of the cellular mobile station, and the Plunkett reference was not used to rejection this claim.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
